

AI-Generated Content Disclosure

All visual, video, audio, profile, character, and related content made available on the SENS Platform is, unless expressly stated otherwise, produced, generated, modified, curated, or displayed by SENS LTD using artificial intelligence, synthetic media technologies, automated tools, and related digital systems.

Platform Content is not user-uploaded performer content and is not intended to depict real human performers, real persons, actual sexual conduct involving real persons, actual relationships, or real events.

What this means

Characters, virtual personas, profiles, names, biographies, statistics, dialogues, scenarios, images, videos, and other content made available on Platform are fictional, synthetic, and AI-generated unless expressly stated otherwise.

AI-generated characters and virtual personas do not represent real persons, do not correspond to actual performers, and are not based on identifiable real-world individuals.

All AI-generated characters are designed, labeled, and represented as adults who are at least eighteen (18) years of age or older and must not be interpreted as minors.

Any resemblance between AI-generated content and any real person, living or deceased, is unintentional and coincidental.

Names, biographies, profile descriptions, personal details, statistics, preferences, messages, and related profile information attached to AI-generated characters are fictional.

How we keep this safe

SENS LTD applies safety, moderation, and compliance controls before and after content is generated, published, displayed, or otherwise made available on Platform.

Input filtering. Prompts, parameters, search queries, and generation requests may be screened to block attempts to generate prohibited content, including content involving minors, real-person likenesses, non-consensual intimate content, unauthorized sexual deepfakes, or otherwise illegal or non-compliant material.

Output review. Generated outputs may be reviewed by automated classifiers, AI safety tools, moderation systems, hash-matching tools, and other technical measures before or after publication.

Human moderation. Flagged outputs, user reports, abuse reports, and compliance alerts may be reviewed by SENS LTD's trust and safety team or other authorized reviewers.

Generation and compliance records. SENS LTD may retain internal records, including prompts, parameters, output hashes, moderation results, reports, and related metadata, for purposes of safety, compliance review, fraud prevention, dispute resolution, and enforcement of Platform policies.

What is strictly forbidden

Users must not request, generate, attempt to generate, upload, submit, share, distribute, search for, or otherwise interact with any content that:

1. Involves, depicts, suggests, sexualizes, exploits, or endangers minors or any person who could reasonably be interpreted as under eighteen (18) years of age;
2. Constitutes or relates to child sexual abuse material, child sexual exploitation, grooming, or any sexualized depiction or implication involving minors;
3. Depicts or suggests non-consensual intimate imagery, sexual violence, coercion, exploitation, trafficking, revenge pornography, hidden-camera content, voyeuristic content, blackmail-related sexual content, or lack of consent;
4. Uses, imitates, reproduces, or exploits the name, image, likeness, voice, biometric features, identity, persona, or recognizable characteristics of any real person without appropriate authorization;
5. Constitutes an unauthorized sexual deepfake or other synthetic intimate content involving a real person or a person reasonably identifiable as real;
6. Is intended to harass, defame, intimidate, threaten, blackmail, exploit, or otherwise harm any real person;
7. Violates applicable law, Platform policies, payment provider requirements, card scheme rules, or third-party rights.

Spot a problem?

If you believe that any content on Platform depicts or resembles a real person, involves a minor, suggests non-consensual content, infringes your rights, or otherwise violates Platform policies, please report it immediately at **abuse@sens.love** or through the in-app **Report** button.

SENS LTD treats such reports as priority matters and may review, restrict, remove, disable, or escalate reported content where appropriate.
